- ANDRTIZ ALSO OFFERS THE ROTO-SHAKER SCREENERS WITH:
- **Diverter Valve Discharge** sends product to two different locations
 - **Receiving Scalper Model** for high capacity scalping of foreign material on a single screen sifter.

ROTO-SHAKER™
Screener

Andritz Roto-Shaker™ Screener uses a proven gyratory-reciprocating screening action that delivers both high capacity and accurate separations. The gyratory screening action at the inlet quickly stratifies and distributes material over the entire screen surface.

Andritz Roto-Shaker™ Screeners are available in eight model sizes with one to four screening surfaces. The Roto-Shaker can be floor mounted, on a stand or suspended by cables. The unit requires very little headroom, making installation easy in limited spaces.

The Roto-Shaker screener is ruggedly designed - built for continuous, trouble-free operation for even the toughest applications.

The computer balanced dynamic drive provided efficient and low maintenance operation while minimizing structural vibrations.

Every Roto-Shaker is backed by our promise for quick dependable service and quality replacement parts..

The Simple V-Belt drive, with only three bearings and fewer moving components reduces operating and maintenance costs.

Andritz Roto-Shaker™ Screener Models

General

The General Roto-Shaker is equipped with:

Wooden Frames for Economical Operation

Easy Handling and Quick Changes with the Sectionalized Screen Frames

A Diverter Valve discharge option is available. Contact our Representatives for more information.

Wooden Screen Frame

Industrial

The Industrial Roto-Shaker is equipped with:

Heavy Duty Segmented Screen Frames
Carbon Steel or Stainless Steel Construction

Increased Screen Life with Spring Tensioned Hook-Up Strip Screen attachment

Easy Adjustment, Great Efficiency.

Heavy Duty Frames

Typical Applications:

Granulated Sugar, Silica products, Pet Foods, Grain cleaning, Vegetable Grading, Ammonium Nitrate, Plastic Pellets and powders, Food Products, Wood Chips, Pigments, Ground Corn Cob, Fish food/meal, Aluminum Scrap, Dried Apples, Cracked Corn cleaning, Fertilizer, Sand, Carbon Black, Urea, Graphite, Meat/Bone Meal, Ascorbic Acid, Detergents, Clay, Citrus Pulp, Sodium Bicarbonate, Ground Glass, Feed Ingredients, Gunpowder, Mica, Petroleum Coke, Coffee Beans, Composted Humus, Foods, Meal Powder, PVC powder and more.

Typical Operation

Roto-Shaker™ Screeners: High Capacity Efficient Operation for Tough Screening Applications

Adjustable Foot-Mounted Motor

Rugged Fiberglass Springs increases screen utilization and efficiency

Specially Formulated Rubber Ball Cleaners. High Bounce and Chemical Resistant

Easy Maintenance with Segmented Screen Decks and Top Cover

Fast and Easy Screen changes with our Quick-Release Clamps.

Ready for Cable Suspension for space concerns and/or vibration reduction

Rugged Channel Construction means reducing vibrational stress

Capacities are based on the General model and obtaining maximum cleanup. If efficiencies of separation can be compromised, higher screening rates would be obtainable.
